Denise Greene Hyde Park update	<p>Has been meeting with resistance. For instance someone left a sign that said, "Hyde Park Tick Farm" at one of the gardens.</p> <ul style="list-style-type: none"> ● Mike Kiernan from "Bee the Change" is coming to help with the Elsa French garden ● There is weed pressure at the municipal garden ● The garden across from the elementary school will be smaller due to weed pressure ● Will post dates on webpage for meadow maintenance days in H.P. they will be every other week ● Denise will host a how-to to install a meadow garden large or small , date tbd
Peter	<ul style="list-style-type: none"> ● Working with neighbors to weed bioretention area on Prospect street to add it to the garden tour ● Tree planting- 10 Bends Hyde Park 3.5 acres and Valley Dream Farm in Cambridge 2.5 acres ● Oxbow planting to come

Meliss Jordan and Deb Adams	Working on Native Plants Garden Tour. Cementing dates and how to publicize
------------------------------------	--

New Business

Agenda Items	Notes
Greensboro Pollinator Protection Group	Denise/Melissa spoke with Zoryan about Greensboro's PPG. Proposed making the same document for PPLC here. It was suggested that they get in touch with Emily Finnegan , Peter's counterpart in Caledonia county. And perhaps have her or Zoryan for a speaker in Sept. to explain how the group operates.
Legislative emails	We all agreed that we would like to continue to get legislative emails from Melissa. She will put "Legislature" in the subject line so we know what it is.
PPLC Webpage	Please send pictures and information to Melissa to update our webpage.
Community Garden Plot	Looking for plants for the garden plot at the community garden. The flood wiped out the plants last year.
Snake worm alert	Rinse plants to bare roots if you get them from another garden. Rinse with vinegar and water. They propagate in compost.

For the next meetings agenda: A look through our webpage.
